ANDHRA LOYOLA INSTITUTE OF ENGINEERING AND TECHNOLOGY, VIJAYAWADA-520008

A Report on

Intellectual Property Rights

Organized by
Civil Engineering Department

God gifted the man with a wonderful organ called Brain. Man started designing his own world by application of his brain or mind and by utilization of these natural resources. Man has also been bestowed with imagination and creativity. With his imagination and creative energy, he has been producing various articles or products for his needs, comfort and convenience. In the earlier era, the creations and inventions by him fell in a public domain. These were the common properties. Anybody could use and copy these creations and inventions without any restriction, reservation or payment.

However, with the passage of time, the importance and value of these creations was realized. The commercial aspect started playing a significant role in these creations. By end of Twentieth Century, the things created and invented by the human mind were recognized as an intellectual property of the owner .The owner's right over these properties was accepted and is known as an Intellectual Property Right (commonly called I.P.R.). A new set of laws called Intellectual Property Right Laws, were enacted to protect these property rights. These I.P.R. laws provided a protection to the owners under different categories and names like Patents, Industrial designs, Copyrights, Trade- Marks etc.

Realising that the awareness of the **Intellectual Property Rights** is essential for the emerging technocrats, the department of Civil organized a guest lecture for III & IV B.Tech students on 13th December2017. **Prof. A. R Arya Sree** delivered a Guest lecture on **INTELLECTUAL PROPERTY RIGHTS.** He said that the intellectual property rights were essentially recognized and accepted all over the world due to some very important reasons. Some of the reasons for accepting these rights are:-

a. To provide incentive to the individual for new creations.
b. Providing due recognition to the creators and inventors.
c. Ensuring material reward for intellectual property.
d. Ensuring the availability of the genuine and original products.

The students learnt that copying, imitation, adaptation, and un-authorised reproduction of creations, without the permission of the owner, may amount to a serious offence. Therefore, the knowledge about intellectual property right was highly beneficial for students.

Workshop on Machine Learning

Date: 7th July, 2017

Careers in **machine learning** are increasing in demand, as algorithms are needed in more industries. So the department of Information Technology organized a one day workshop on **Machine Learning** on 7th July, 2017. Mr.Siva Rama Krishna Ghatti, Director, web and mobile application development, California,USA was the resource person. He said that knowledge of Machine Learning opens career opportunities like Software Engineer, Software Developer, and Designer in Human- Centered Machine Learning, Data Scientist, and Computational Linguist etc.

Machine learning is the scientific study of algorithms and statistical models that computer systems use in order to perform a specific task effectively without using explicit instructions, relying on patterns and inference instead. It is seen as a subset of artificial intelligence. It was one day workshop of two sessions on Machine Learning in which 60 students attended and gained hands-on experience.

Workshop on R-Programming

Date: 22nd January,2018

The department of Information Technology organized a one day workshop on **R-Programming** on 22ndJanuary, 2018. **Mr.Intisar Mehndi**, Trainer, Braino Vision India Pvt. Ltd, Hyderabad, was the resource person. There are many career opportunities in R Programming like Data Scientist, Data Analyst, Data Architect, Data Visualization Analyst, Geo Statisticians, Database Administrator and Quantitative Analysis. Students learnt that Rprogramming language provides an environment for statistical computing and graphics of data. It has a wide variety of statistical techniques like linear modeling, time and series analysis, classification, etc. They also provide graphical techniques which are extensible. It provides well designed high-quality plots which can be produced with mathematical formulas and symbols. It has a suite that combines facilities like data manipulation, calculations and a graphical display for data analysis. Around 60 students attended the workshop to gain hands-onexperience.

Workshop on Database

Date: 14th February, 2018

Every industry relies heavily on databases. From traditional professions, such as medical, legal, and real estate, to high tech companies, like Google and Apple, the use of databases is what allows businesses and those in these professions to track a wide range of data. Realising the importance of Database, the department of Information Technology organized a one day workshop on **Database** on 14th February, 2018**.** A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques.

This workshop helped the students to acquire first hand information related to different database domains. **Mr. Ramesh Vudata**, Managing Director, AARWII Tech solutions Pvt. Ltd, Malaysia enlightened the students on the topic. Around 60 students attended the workshop to gain hands-on experience.

DEPARTMENTOFMECHANICALENGINEERING

Workshop

Title: **Applications of NDT in various Industries** **Date(s):** 24th & 25th Feb 2018 **Time:** 10.00AM – 04.00PM
Resource person: Mr. Vijay Kumar & Team, Future NDT (An ISO 9001:2005 Certified Organization), Vijayawada
Participants: 60 Mechanical students of IV Year, I Semester Two faculty members attended the workshop.

Description about the Workshops:
The aim of organizing a two day workshop on **Applications of NDT in various Industries** on 24th& 25th Feb 2018 is to transform the students into technically most reliable engineers who can endeavor in their careers in the present competitive world. It was organized by the department of mechanical for final year students.

The field of Non Destructive Testing (NDT) is a very broad, interdisciplinary field that plays a critical role in assuring that structural components and systems perform their function in a reliable and cost effective fashion. NDT technicians and engineers define and implement tests that locate and characterize material conditions and flaws that might otherwise cause planes to crash, reactors to fail, trains to derail, pipelines to burst, and a variety of less visible, but equally troubling events. These tests are performed in a manner that does not affect the future usefulness of the object or material. In other words, NDT allows parts and materials to be inspected and measured without damaging them. Because it allows inspection without interfering with a product's final use, NDT provides an excellent balance between quality control and cost-effectiveness.

Mr. Vijay Kumar, Managing Partner of the FUTURE NDT, Vijayawada (An ISO 9001:2005 Certified Organization) and his team demonstrated various Non Destructive Tests by elaborately explaining the theory behind it. The workshop was organized to provide various job opportunities to the students by transforming them into the most efficient engineers who can deal with the non destructive testing in any manufacturing industries in India and abroad. The institution takes great pleasure in organizing such programs by inviting efficient trainers.

Report on Seminar/Conference/Workshop/FDP conducted
Title: R Programming & Python   **Date(s):** 28-7-2017 to 29-7-2017
Preamble: A Two day workshop on **R Programming & Python** was conducted on 28-7-2017 and 29- 7- 2017, at Andhra Loyola Institute of Engineering and Technology, Vijayawada, Krishna District of Andhra Pradesh.
Participants Profile: A total of 140 students and Faculty members of the department of CSE, ALIET participated in this workshop.
Description about the Program: The primary objective of the workshop is to educate the faculty and the students about the advancements that have been taking place in programming languages like R & Python.   The department of CSE, organized a two day workshop on R Programming & Python on 28 July and 29 July 2019. **Dr. LAKSHMI LYDIA,** Professor VIIT, VIZAG and **Dr.A. KRISHNA MOHAN,** Professor, HoD of CSE Dept, JNTUK were invited as resource persons.
Dr. LAKSHMI LYDIA, Professor VIIT, VIZAG said that R is a programming language and free software environment for statistical computing and graphics supported by the R Foundation for Statistical Computing. The R language is widely used among statisticians and data miners for developing statistical software and data analysis. He further said that R provides a suite of operators for calculations on arrays, lists, vectors and matrices and also provides a large, coherent and integrated collection of tools for data analysis.
Dr.A. KRISHNA MOHAN, Professor, HoD of CSE Dept, JNTUK stated that Python is an interpreted, high-level, general-purpose programming language. Created by Guido Van Rossum and first released in 1991, Python's design philosophy emphasizes code readability with its notable use of significant whitespace.   The knowledge of R Programming & Python is important for engineering students to excel in their career. This workshop proved to be highly useful for the students and staff.

Report on Seminar/Conference/Workshop/FDP conducted

Title: E-Waste Management

Date(s): 29-9-2017

Preamble:

A One day Seminar on **E-Waste Management** was conducted on 29-9-2017, at Andhra Loyola institute of Engineering and Technology, Vijayawada, Krishna District of Andhra Pradesh.

Participants Profile:

A total of 140 students& Faculty members from the department of CSE, ALIET participated in this seminar.

Description about the Program:

In India, the quantity of e-waste or electronic waste has become a major crisis. Disposal of e-waste is an emerging global environmental and public health issue, as this waste has become the most rapidly growing segment of the formal municipal waste stream in the world. Therefore, the need of proper e-waste management has been realized by the institution. A One day Seminar on **E-Waste Management** was conducted on 29-9-2017.The Resource Person of this seminar was **Mr.V.SANJEEV**, Joint Director, Technology Park of India (STPI), Vijayawada. In his lecture, he discussed the importance of e- waste management. Electronic waste or e-waste describes discarded electrical or electronic devices. Used electronics which are destined for refurbishment, reuse, resale, salvage, recycling through material recovery, or disposal are also considered e-waste. The primary objective of the seminar is to educate the students on e –waste and to review the public health risks and strategies to combat this growing menace.

Feedback:

All the students expressed their satisfaction and gave positive feedback on the seminar.

Report on Seminar/Conference/Workshop/FDP conducted

Title: Teaching Methodologies

Date(s):8th&9thJune2017

Preamble:

AThree dayFDPon"TeachingMethodologies"wasconducted on8th&9thJune2017, at Andhra Loyola Institute of Engineering and Technology, Vijayawada, Krishna District of Andhra Pradesh.

Participants Profile:

A total of 32 Faculty members from the department of CSE &IT of ALIET participated in this FDP.

Description about the Program:

The impact a teacher creates on a student can be multifaceted. Awareness of the right teaching

methodologies is important to enhance the teaching and learning program. So the department of

CSEandITconductedathreedayFDPon**TeachingMethodologies**on8th&9thJune2017.The Resource

Person of this FDP was **Dr. Ch. Rupa**, Professor Dept. of CSE, VRSEC, Vijayawada, Krishna

Dist.This program mainly focused on various teaching methodologies that help the faculty in

improving the quality of teaching.

Feedback:

All the Faculty members expressed their satisfaction and posted a positive feedback on the programme.

Title: "Cryptography & Network Security" **Date(s):** 10-7-2017
Preamble: A One day seminar on **"Cryptography& Network Security**" was conducted on **10- 7-2017**, at Andhra Loyola institute of engineering and technology, Vijayawada, Krishna District of Andhra Pradesh.
Participant's Profile: A total of 140 students and Faculty members (CSE) from ALIET participated in this seminar.
Description about the Program: The department of Computer Science conducted a one day seminar on **"Cryptography&** **Network Security"** on 10- 7-2017. Dr.A.SUDHEER BABU, Professor, Dept of CSE, PVPSIT, Vijayawada was the Resource Person. In computer science, cryptography refers to secure information and communication techniques derived from mathematical concepts and a set of rule- based calculations called algorithms to transform messages in ways that are hard to decipher. Computer data often travels from one computer to another, leaving the safety of its protected physical surroundings. Once the data is out of hand, people with bad intention could modify or forge your data, either for amusement or for their own benefit. The primary objective of the seminar is to group the faculty and the students to discuss the latest trends and technology available in Cryptography & Network Security.

Feedback:

All the students expressed their satisfaction about the Seminar

Report on Seminar/Conference/Workshop/FDP conducted
Title: "UNDERSTANDING THE ROLE OF JAVA PROGRAMMING"   **Date(s):** 8-1-2018 to 9-01-2018
Preamble: A Two day workshop on **Understanding the Role Of Java Programming** was conducted by the department of CSE, on **8-1-2018 and 9-01-2018**, at Andhra Loyola Institute of Engineering and Technology, Vijayawada, Krishna District of Andhra Pradesh.
Participant's Profile: A total of 140 students &Faculty members from the department of CSE, ALIET participated in this workshop.

Description about the Program:

Java is a general-purpose programming language that is class-based, object-oriented, and designed to have as few implementation dependencies as possible.

It is used in both software and web development. Java is one of the most popular programming languages used to create Web applications and platforms. It was designed for flexibility, allowing developers to write code that would run on any machine, regardless of architecture or platform. More than 1 billion computers and 3 billion mobile phones worldwide run Java. So the department of CSE organized a two day workshop on **Understanding the Role Of Java Programming** on 8th and 9th January 2018.

The Resource Person of this workshop was **Mr.Intisar Menhdi**, Director of BRAIN O VISION Pvt. Ltd, Bangalore. In his lecture, he stated that Java is used to build applications and platforms for a number of devices, including computers, laptops, gaming consoles, Blu-ray players, car navigation systems, medical monitoring devices, parking meters, lottery terminals and smart phones. It is also a key language for networking, particularly for data centers that store and transfer Web-based data.

Students were excited to know that Java is also used to create miniature, dynamic programs that run alongside or are embedded within Web pages. These programs called applets, can be used to display maps, weather, games or other interactive widgets or tools on a Web page. Knowledge of JAVA PROGRAMMING was highly useful for the students for academic /career advancement.

Feedback:

All the students expressed their satisfaction in the feedback.

Report on Seminar/Conference/Workshop/FDP conducted

Preamble:

A Two day workshop on "DEVELOPMENT USING SPRING TOOL SUITE" was conducted on 5-1- 2018 and 6-01-2018, at Andhra Loyola Institute of Engineering and Technology ,Vijayawada, Krishna District of Andhra Pradesh.

Participants Profile:

A total of 140 students Faculty members of CSE, ALIET participated in this workshop.

Description about the Program:

The department of CSE organized a workshop on **DEVELOPMENT USING SPRING TOOL SUITE** on 5th and 6th January 2018. The primary objective of the workshop is to enlighten the faculty and the students on the advancements that have been taking place in Spring Tool Suite. The Spring Tool Suite provides a wide range of operations and functions to develop applications which mainly focus on improvising security configuration, web applications, Big Data Analytics etc. The Resource Person of this workshop was **Mr.A.VENU GOPAL,** Senior Software Engineer, MPHASIS, Bangalore.

In this workshop, students worked through the steps of creating a hello world Spring Model View Controller (MVC) application using Spring Tool Suite (an Eclipse-based IDE). They learnt the fundamental concepts of Spring MVC during building the sample application. The tools/technologies used in the workshop were:

- o Spring framework 3.2.2
- o Spring Tool Suite IDE 3.2.0 (based on Eclipse Juno 4.2.2).
- o vFabric tc Server Developer Edition v2.8 (based on Apache Tomcat and optimized for Spring applications).

Feedback:

All the students expressed their satisfaction in their feedback.

Report on Seminar/Conference/Workshop/FDP conducted
Title: "Understanding role of Python and R programming" **Date(s):** 26-4-2018 to 28-4-2018
Preamble: A Three day FDP on"Understanding role of python and R programming" has been conducted on 26-4-2018 to 28-4-2018, at Andhra Loyola institute of engineering and technology ,Vijayawada Krishna District of Andhra Pradesh.
Participant's Profile: A total of 32 Faculty members (CSE&IT) of ALIET participated in this FDP .

Description about the Program:

The primary objective of the workshop is to educate the faculty and the students about the advancements that have been taking place in programming languages like R & Python.

The department of CSE, organized a two day workshop on **Understanding role of python and R programming** from 26 to 28 April 2018. **Mr. INTISAR MENHIDI,** Director of BRAIN O VISION Pvt. Ltd, Hyderabad was the Resource Person. He said that Python is an interpreted, high-level, general-purpose programming language. Created by Guido Van Rossum and first released in 1991, Python's design philosophy emphasizes code readability with its notable use of significant whitespace. R is a programming language and free software environment for statistical computing and graphics supported by the R Foundation for Statistical Computing. The R language is widely used among statisticians and data miners for developing statistical software and data analysis. The primary

objective of the FDP is to group the faculty and the researchers to discuss the latest

trends and technology available in all aspects of R-Programming and learn the

nature of data through software which makes the preliminary concepts right away

using R and Python. This programme enabled the participants to understand the

data modeling and visualization to perform efficient statistical analysis. The

workshop was found to be highly useful for staff.

Workshop on Java Application Development

Date: 27thand 28thJuly, 2017

Java Programmers are highly in demand, earning good salaries in top MNCs. So the department of Information Technology organized a two day workshop on **Java Application Development** on 27th and 28thJuly, 2017 to give ample opportunities for students.

Java, derived from C and C++, is an object-oriented programming language having a simple object model. Java has helped programmers in simplifying the coding and developing applications and installing them on cross-platform systems. We find Java applications on desktops, laptops, mobiles, tablets, embedded devices, cloud computing servers and also supercomputers. **Mr. S. Naresh Kumar**, Technical Lead & Managing Director, Access software solutions, Rajahmundry, said that **Java** is the most widely used software platforms for developing applications, whether used client-side or server-side. The students felt that the workshop was highly informative.
