

#### 4.2.1 Library is automated using Integrated Library Management System (ILMS)

ACADEMIC YEAR	Name of the ILMS software	Nature of automation (fully or partially)	Version
2014-2015	NEW GEN LIB	FULLY	3.1.1
2015-2016	NEW GEN LIB	FULLY	3.1.2
2016-2017	NEW GEN LIB	FULLY	3.1.3
2017-2018	NEW GEN LIB	FULLY	3.1.4
2018-2019	NEW GEN LIB	FULLY	3.1.4
2019-20	NEW GEN LIB	FULLY	3.2
2020-21	NEW GEN LIB	FULLY	3.2

#### Description

NewGenLib is a fully web based integrated library management software that runs on distributed computers through a network or server. It can also run on local area networks without access to the Internet. NewGenLib supports following major international standards for better interoperability. NewGenLib is a complete solution for libraries. It is a unique combination of a library automation software, digital library software and a database search facilitator. With its version 3.1.1 users can not only search library catalogue, but also search various databases subscribed by the library and some open access databases at a single click. NewGenLib is based on Client- Server technology for managing library functions and creating digital library where as its Online Public Access Catalogue is accessible through the Web. NewGenLib is compatible with International standards such as MARC 21 for bibliographic description, ISBD, OAI-PMH Protocol, Z 39.50 Protocol, Dublin Core, Unicode, and many more. It uses Java technology, PostgreSQL for the database, and Apache for Web server. NewGenLib unlike Koha is a platform independent software which turns it more beneficial for the user who are not well verse with Linux. It has five main modules, i.e. technical processing (cataloguing), circulation, acquisitions serial management, and OPAC besides administration, queries and reports.

#### FEATURES OF NEWGENLIB 3.1.1

Verus solutions provides a detailed list of features on their website as followings. Completely web-based application with Java technology. Compatible with international standards such as MARC 21, MARC-SML, Z39.50, SRU/W, OAI-PMH All supported software applications are free or open source Scalable, manageable and efficientCompatible to run on any version of

Window (except window 95, 98 and 2000) and Linux. Z39.50 Client for federated searching Internationalized application (I18N) Automated email/instant messaging is integrated in different function of software• Form and letter can be configured to save time• Extensive use of parameters to enable easy configuration of the software to suit specific• needs Allows digital attachment to metadata. Enables users to search online databases through OPAC• Self-issue return is enabled that save the time of the user and labour of the library.

## VARIOUS MODULES

**Acquisition:** The acquisition module provides a complete solution for acquisition process in a library. This module facilitates to invite quotation from vendors too. If users of the library make requests for new purchase through OPAC they reflect in the acquisition modules request menu. Moreover, NewGenLib is compatible with Z39.5 protocol for searching and import bibliographic records that help to import the bibliographic records from other libraries. It saves a lot of time of the library in cataloguing.

**Cataloguing:** cataloguing is done under the MARC 21 standard. NewGenLibhas already createdsome templates that have simplified the MARC highly. One can easily identify the template and based on the given field cataloguing can be done. These pre designed templates are for cataloguing of book, journal, patent, non-book material, book chapter, journal article, newspaper, etc. One can also attach a digital document to a bibliographical record that converts the OPAC to a digital library. This module facilitates to search the catalogue through the default search index and enable administrator to create his/her own search index.

**Circulation:** Besides very well-known function of circulation services such as issue, return, renew, reservation, Inter-library loan this module also provides many other facilities. This module covers Binding management module that is useful when books are removed for binding and are not be available for circulation. It also has the facility to recall an issued item back in urgent circumstances. NewGenLib provides self-check-in, self-check-out facilities that is managed and verified from circulation module. In case an item is lost or need to be weeded out, circulation also manages these functions also. NewGenLib also provides facility of collecting the overdue on a book in later stages. As NewGenLibis integrated with RFID and Barcoding facilities, circulation functionalities can be integrated with the same that saves a lot of time of the library to enter the user ID and the book accession number manually.

On each circulation NewGenLib automatically sends an email to the user to notify him/her about the circulation. In case of an overdue book, it also sends overdue notices to the users. Version 3.1.1 has added a new feature to record the uses of books of reference section and books which cannot be issued under general circulation. In short reference section can also use and record uses of reference material. Serial Management: NewGenLib provides a complete solution for acquisition, cataloguing and management of serials. Serial management is one of the very difficult functions of a library that is very well handled by NewGenLib. It provides a complete set of functions right from adding new subscriptions to archiving through bound volumes. One can add the complete list of approved serials for subscription, raise orders for these serials, or cancel any order and re-order any cancelled order, receive receipts and process advanced payments, receive serial issues, manage out-of receipt issues as well as delayed issues. This module also provides functionality to add supplements, indexes received with primary issues, so that the library does not get confused between the number of primary issues and supplements. If the library wants to get old serials volumes bound together, a complete workflow is available in NewGenLib for smooth binding process. In addition to this, the librarian can also create a list of serials which the library wishes to renew, this reduces the workload of the librarian at the time of serials subscription. For displaying the holdings of the library in the OPAC, NewGenLib uses Z39.76 protocol that is a standard protocol for the serial display.

**Web OPAC :** OPAC is an essential element of any ILS software. In the age of Google users expect their library's OPAC to compete with search engines, though typically it is not possible for a standalone library to offer wide information through its OPAC. But there are many other features, where an OPAC can compete with a search engine. NewGenLib has advanced its OPAC by facilitating the library to attach a full text document. Version 3.2 of NewGenLib provides many facilities for the users of the library, i.e. RSS widget, where libraries can offer an RSS feed from any website; export report, users can export any bibliographic record in several formats to their desktop or can take a print of it or mail it to anybody; it also provides information on users' SDI profile.

## CONCLUSION

With the help of high level of technology and international standards NewGenLib in a very short period of time has earned fame as sustainable open source software for library automation. It is advisable to library professionals who are looking forwards for library automation software may adopt NewGenLib ILS to automate their libraries.

# Book expo begins

**SPECIAL CORRESPONDENT**

**VIVJAYAWADA**

K. Venkat Rao, librarian and syndicate member, Acharya Nagarjuna University, Guntur, inaugurated a three-day book exhibition-cum-sale at Fr. Gordon Library of Andhra Loyola College on Thursday. Speaking on the occasion, he said book exhibitions promoted reading habit among students and helped them enhance their personality traits.

College Rector Fr. P. Ba-

lashowry, Director of Andhra Loyola Institute of Engineering and Technology A. Francis Xavier, Correspondent, ALC, M. Sagayaraj and Principal G.A.P. Kishore encouraged students to take to book-reading habit. ALC librarian G.A. Prasad Rao introduced publishers from Chennai, Hyderabad and Vijayawada and Fr. Rex Angelo made the first purchase at the expo. Many students bought books of their choice kept in two separate halls.

### Guest Lecture

Library organized a Guest Lecture on “Utilization of e-resources and open access” on 22<sup>nd</sup> February 2019 from 2.00 pm to 4.00 pm at south seminar hall. Dr.Y.SrinivasaRao, Librarian of School of planning and Architecture, Vijayawada was the resource person. Our Students and staff were benefited by knowing about e-resources.

2 REGION *The Hindu* 23-2-2019

## Students told to use e-resources

'Libraries redesigned to support academics through IT'

SPECIAL CORRESPONDENT  
VIJAYAWADA

Y. Srinivasa Rao, deputy librarian, School of Planning and Architecture, Vijayawada, on Friday urged students to utilise e-resources.

Delivering a guest lecture organised by the Department of Library and Information Sciences, Andhra Loyola Institute of Engineering and Technology (ALLET), Mr. Rao underscored the need to build intellectual creations to make the nation rich, innovative and competitive. Pointing to the fact that libraries were hub of know-

ledge resources and the 'heart of a university', he said they route a fundamental path for change in the academic system.

He said as facilitators, libraries made a strategy for supporting the academic vision towards creation of 'world class university system'.

He said libraries were redesigned to support academic system in production of new knowledge, products, processes and services through IT services.

Later, interacting with the participants on 'open ac-

cess', he said it was important because it benefited everyone, from researchers whose work benefited through increased collaboration and sharing to communities who benefited from the accelerated pace of discovery. He also threw light on the types of open access, i.e. green, gold and hybrid.

Director Rev. A. Francis Xavier and principal O. Mahesh felicitated him. Assistant directors J. Chiranjeevi and Rev. Anil Kumar and librarians K. Swathi Kiran and K. Mallika were present.

**National Library Week**

Andhra Loyola college and Andhra Loyola Institute of Engineering and Technology collaboratively conducted National Library week celebrations and 150<sup>th</sup> Birth Anniversary of Mahatma Gandhi on 25<sup>th</sup> November 2019. On this occasion, we arranged a book exhibition on special collections of Mahatma Gandhi. Students and staff visited the Book Exhibition and benefited by purchasing good books.
