

5.2.2: Percentage of student progression to higher education

Keeping the motto '*Magis*'- more or greater, ALIET tries to inspire the students toaspire for higher education. Various departments in the college organize guest lectures andorientations programmes to the students to make them understand the significance of highereducation. The library facilitates the student to get more information by providing access tothe internet, newspaper, books and periodicals. Industrial visits and internships with various industries help the students understand the emerging technologies in their respective discipline.

The percentage of student progression to higher education is less due to the following considerable reasons:

1. **Many students are opting for employment after under graduation in both governmental and non-governmental sectors.**
2. **Some students are seeking for employment in reputed organizations.**
