4.2.1 Library is automated using Integrated Library Management System (ILMS)

ACADEMIC YEAR	Name of the ILMS software	Nature of automation (fully or partially)	Version
2021-22	NEW GEN LIB	FULLY	3.2

Description

NewGenLib is a fully web based integrated library management software that runs on distributed computers through a network or server. It can also run on local area networks without access to the Internet. NewGenLib supports following major international standards for better interoperability. NewGenLib is a complete solution for libraries. It is a unique combination of a library automation software, digital library software and a database search facilitator. With its version 3.2 users can not only search library catalogue, but also search various databases subscribed by the library and some open access databases at a single click. NewGenLib is based on Client- Server technology for managing library functions and creating digital library where as its Online Public Access Catalogue is accessible through the Web. NewGenLib is compatible with International standards such as MARC 21 for bibliographic description, ISBD, OAI-PMH Protocol, Z 39.50 Protocol, Dublin Core, Unicode, and many more. It uses Java technology, PostgreSQL for the database, and Apache for Web server. NewGenLib unlike Koha is a platform independent software which turns it more beneficial for the user who are not well verse with Linux. It has five main modules, i.e. technical processing (cataloguing), circulation, acquisitions serial management, and OPAC besides administration, queries and reports.

FEATURES OF NEWGENLIB 3.2

Verus solutions provides a detailed list of features on their website as followings. Completely web-based application with Java technology. Compatible with international standards such as MARC 21, MARC-SML, Z39.50,. SRU/W, OAI-PMH All supported software applications are free or open source Scalable, manageable and efficientCompatible to run on any version of

Window (except window 95, 98 and 2000) and Linux. Z39.50 Client for federated searching Internationalized application (I18N) Automated email/instant messaging is integrated in different function of software• Form and letter can be configured to save time• Extensive use of parameters to enable easy configuration of the software to suit specific• needs Allows digital attachment to metadata. Enables users to search online databases through OPAC• Self-issue return is enabled that save the time of the user and labour of the library.

VARIOUS MODULES

Acquisition: The acquisition module provides a complete solution for acquisition process in a library. This module facilitates to invite quotation from vendors too. If users of the library make requests for new purchase through OPAC they reflect in the acquisition modules request menu. Moreover, NewGenLib is compatible with Z39.5 protocol for searching and import bibliographic records that help to import the bibliographic records from other libraries. It saves a lot of time of the library in cataloguing.

Cataloguing: cataloguing is done under the MARC 21 standard. NewGenLibhas already createdsome templates that have simplified the MARC highly. One can easily identify the template and based on the given field cataloguing can be done. These pre designed templates are for cataloguing of book, journal, patent, non-book material, book chapter, journal article, newspaper, etc. One can also attach a digital document to a bibliographical record that converts the OPAC to a digital library. This module facilitates to search the catalogue through the default search index and enable administrator to create his/her own search index.

Circulation: Besides very well-known function of circulation services such as issue, return, renew, reservation, Inter-library loan this module also provides many other facilities. This module covers Binding management module that is useful when books are removed for binding and are not be available for circulation. It also has the facility to recall an issued item back in urgent circumstances. NewGenLib provides self-check-in, self-check-out facilities that is managed and verified from circulation module. In case an item is lost or need to be weeded out, circulation also manages these functions also. NewGenLib also provides facility of collecting the overdue on a book in later stages. As NewGenLibis integrated with RFID and Barcoding facilities, circulation functionalities can be integrated with the same that saves a lot of time of the library to enter the user ID and the book accession number manually.

On each circulation NewGenLib automatically sends and email to the user to notify him/her about the circulation. In case of an overdue book, it also sends overdue notices to the users. Version 3.1.1 has added a new feature to record the uses of books of reference section and books which cannot be issued under general circulation. In short reference section can also use and record uses of reference material. Serial Management: NewGenLib provides a complete solution for acquisition, cataloguing and management of serials. Serial management is one of the very difficult function of a library that is very well handled by NewGenLib. It provides a complete set of functions right from adding new subscriptions to archiving through bound volumes. One can add the complete list of approved serials for subscription, raise orders for these serials, or cancel any order and re-order any cancelled order, receives receipts and process advanced payments, receive serial issues, manage out-of receipt issues as well as delayed issues. This module also provides functionality to add supplements, indexes received with primary issues, so that the library does not get confused between the number of primary issues and supplements. If the library wants to get old serials volumes bound together, a complete workflow is available in NewGenLib for smooth binding process. In addition to this, the librarian can also create a list of serials which library wishes to renew, this reduces workload of the librarian at the time of serials subscription. For displaying the holding of library in the OPAC, NewGenLib uses Z39.76 protocol that is a standard protocol for the serial display.

Web OPAC : OPAC is an essential element of any ILS software. In the age of Google users expect their library's OPAC to compete with search engines, though typically it is not possible for a standalone library to offer wide information through its OPAC. But there are many other features, where an OPAC can compete with a search engine. NewGenLib has advanced its OPAC by facilitating the library to attach a full text document. Version 3.2 of NewGenLib provides many facilities for the users of library, i.e. RSS widget, where libraries can offer an RSS feed from any website; export report, users can export any bibliographic record in several formats to their desktop or can take a print of it or mail it to anybody; it also provides information on users SDIprofile.

CONCLUSION

With the help of high level of technology and international standards NewGenLib in a very short period of time has earned fame as sustainable open source software for library automation. It is advisable to library professionals who are looking forwards for library automation software may adopt NewGenLib ILS to automate their libraries.

72nd Constitution Day Celebrations and Commemorate the Father of Indian Constitution

Title: Elocution : Constitutional Democracy
Date(s): 26.11.2021

Venue: MBA Seminar Hall

Participant's: Students and Faculty: MBA & B.Tech – Attendees - 54, Participants - 16

Judge: Mr. K. John Raja Ravi Kiran, Assistant Professor, Department of MBA

Description about the event: "CONSTITUTION is not a mere LAWYERS DOCUMENT, it is a VEHICLE OF LIFE, and its SPIRIT is always the SPIRIT OF AGE."- Dr. B. R. Ambedkar. To Commemorate Dr. B. R. Ambedkar, "The Father of Indian Constitution" and to celebrate 72nd Constitution Day, Department of MBA in collaboration with NDLI Club, Andhra Loyola Institute of Engineering and Technology, Vijayawada conducted an elocution competition with the theme of "Constitutional Democracy" on 26th November, 2021. The program started with reading 'Preamble' and reaffirming the Fundamental duties, rights and Directive Principles of the State policy. Later, students actively participated in the Elocution competition and showed their tribute to the "Father of the Constitution". Rev. Fr. Britto Martin Pual, Assistant Director, ALIET distributed prizes to the winners.

Remarks / Feedback

Andhra Loyola Institute of Engineering and Technology NDLI CLUB and Department of Information Technology jointly organized National Technology Day on May 11th.Chief guest Mrs. P. Manikya Prasuna, Associate Professor, department of CSE, ALIET delivered her valuable speech on Technology in our day to day life. She started her speech with the significance of the day that "National Technology Day is celebrated on May 11 every year to commemorate the achievements of scientists, researchers, engineers and all others involved in the field of science and technology. The day celebrates the first successful nuclear test, which was carried out at Pokhran, Rajasthan. The day is celebrated to create awareness and inspire young minds across schools, colleges and other institutions all over the country. Further she continued her speech with prominence of technology as "we should remember to use new technologies only for the welfare of the others. Technology is best when it brings people together." On this occasion essay writing competition was held. Many students actively participated in the event. In the event IT HoD Mr.S.Kishore Babu, Librarian Mrs.K.Swathi Kiran, Principal Dr.O.Mahesh Assistant director Father Britto Martin Paul,SJ.,Staff and students were participated and made the event successful.

PDF OF ESSAY WRITING SENT TROUGH GMAIL

Topic :- Role of Library for career Enhance--ment.

The study in library clearly shows how the student cultures.

the career enhancement and Role of library

⇒ Most of the students has confusion about their careers paths when first arriving at college and due to some of our faculty words we know the value of library and How to acquire knowledge.

⇒ on listening our faculty words, brought up new and interesting questions.

⇒ the role of library is to students acquire knowledge, facts about their branch subjects.

⇒ And those students unsure how to begin a research project

⇒ Due to these projects, the students are well trained about their future career paths.

⇒ In order to move ahead from semester to semester, students effectively in Professional and future learning

⇒ librarians are trained in information technology so that they can make use

Providing effective inform-

Role Of Library For Career Enhancement

'Library - the treasure of knowledge'

In order to gain more knowledge in a subject, books are the reference agents. A collection of more than millions of such books are available only in a library. So, 'library' is the treasure of knowledge for 'Career Enhancement'.

Library is the best place to incorporate new ideas, interpret things, to quest more knowledge and to develop the things for better future. As far as I believe, library is the best resource for a person who quest for knowledge. If you are in a confusion about your career, you can go to a library. I bet that, you would surely find a way that takes you forward to achieve wonders in your future. It enhances the better path for your career. 'When a trouble strikes, head to the library. Either you will find the solution or you'll find a similar way to find the answer'.

Only when you have a strong grip on the subject and also practical knowledge about it, then the justification for your education is done. I also believe that, 'The weapons to fight with world are found in library'. 'Fight' means, I don't mean to say its 'war', but to compete with world in 'knowledge war'. Library has all the knowledgable resources that paves a better path for future. It doesn't restrict things to a particular subject. It contains a range of books like about history, novels, storybooks, comics for entertainment, software

E

and programming books which enhance the program development skills in the reader. And not to forget, it is useful for someone who write and practice new subjects in a book. Orelse, if you just read without your pen on your paper, it is futile.

I also would like to stress a point that, libraries are like free coaching classes because, you no need pay a penny to read books. So, knowledge is free to gain in a library. So, utilize this treasure to uplift your career. As, I would like to stress a point that, library plays an essential role in enhancing the carrer of an individual. Be selfish to gain knowledge. Don't feel inferior about books because the modern world is digitalised and that everything runs on digital platforms. Everything has its own priority and importance. Sometimes, library contains ancestorial knowledge about history that we feel we are in past while we are reading the books of historial epics. Books show the reality of world. But there's a world beyond reality.

Finally, I would like to conclude by saying that

"Read today to Lead tomorrow"

Andhra Loyola Institute of Engineering Technology.
Vijayawada – 520008.

Dt : 27-10-2021.

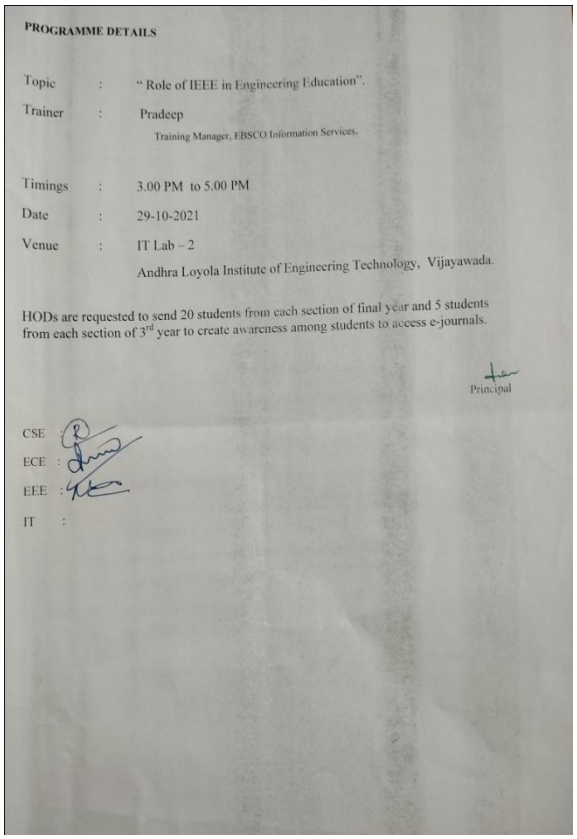
Circular

There will be a user-orientation session on “Role of IEEE in Engineering Education”.

IEEE Xplore Digital Library training provides the ideal opportunity to discover (or re-discover) time-saving features for your research like,

- Retrieving the right set of articles from over 5 million records
- Identify new research areas and tracking technology trends
- Learn to access supplemental items such as IEEE Media files, Algorithmic Codes & Datasets
- Exporting mathematical equations and downloading high resolution figures
- Knowledge sharing and collaboration with team members
- Receiving alerts on the new contents and journals of your interest
- Research documentation and reference management
- Advanced search techniques for campus interviews and placements
- Publishing tool via IEEE Author Centre
- Exploring upcoming conference in your region and topic of interest at ieee.org
- Session review Q&A and online quiz

This webinar would be hands-on session where participants can practice during the session.



PROGRAMME DETAILS

Topic : “ Role of IEEE in Engineering Education”.
Trainer : Pradeep
Training Manager, EBSCO Information Services.

Timings : 3.00 PM to 5.00 PM
Date : 29-10-2021
Venue : IT Lab – 2
Andhra Loyola Institute of Engineering Technology, Vijayawada.

HODs are requested to send 20 students from each section of final year and 5 students from each section of 3rd year to create awareness among students to access e-journals.
