SENSITISATION PROGRAMME ON WORLD WATER DAY

Event: Conservation of Water

Date: 22nd March, 2022

Andhra Loyola Institute of Engineering and Technology students of III and IV year Civil department celebrated World Water Day by sharing their valuable inputs to the students of V.M.R.R.M.C.S.G. High School, Krishnalanka, Vijayawada. Students enlightened on the importance of water and its conservation in day to day lives. They demonstrated various sources of water conservation through placards and with the help of motion pictures. Students created an awareness to the young children and promoted responsible use of water and procedure to access save and healthy water to the present and prospective generations. They also guided the young minds to solve the water and sanitation crisis for the upcoming generations and build ecological balance to our lives.

The management of ALIET was always ahead to organize events of this kind. The NSS Coordinator Mr. A. Rajesh and Civil Department faculty Mrs. A. Swathy Padmaja actively took part in this event and made it a grand success.

CLIMATHON -2021

Event: Awareness on Climate change

Date: 27th October 2021

Climathon is a city-based programme that offers a path to action and interaction. It is an opportunity for citizens to co-create ideas that address local climate challenges. The impacts of climate change are all around us, coming even harder and faster than the models predicted. When global climate politics is stifling, it's your turn to move. When business-as-usual is blind to the scale of the crisis we're facing, you have the ability to envision. When faith in policies to fix the problem is fading, our hope rests in people like you. Seeds of change can sprout from a single idea. That is what Climathon is about. Climathon is a stage for those that want to act on behalf of the needs of our planet. Professor Dr.P.Brahamaji Rao, has enlightened the 200 students from different colleges all over Vijayawada on climate change and its impact on agriculture. Rev. Fr. Dr. A. Francis Xavier, Director, ALIET greeted the students for the initiative taken by them. Dr. O. Mahesh, Principal has told that activities of this kind along with academics will churn the students as perfect citizens. The programme was headed by Dr. V.V.Prabhakar Rao, Mr. P. Rajesh, Extension In-Charge, and in collaboration with Youth for Seva.

AWARNESS PROGRAMME ON WORLD OZONE DAY

MONTREAL PROTOCOL KEEPING FOOD, US, OUR AND VACCINES COOL

Event: Awareness on Ozone layer

Date: 16th September 2021

This year's 2021 theme for the International Day for the Prevention of the Ozone Layer is 'Montreal Protocol Keeping food, us, our and vaccines cool.' The Ozone layer is a piece of the atmosphere that has high ozone concentrations. Ozone is a gas that is made of three oxygen atoms, O₃. Depending on where the ozone layer is, it can either harm life or protect life on Earth. Most of the ozone stays within the stratosphere, whereby it acts as a shield, protecting the surface of the Earth from the harmful ultraviolet radiation of the sun. If this shield was to weaken, we would all be more susceptible to impaired immune systems, cataracts, and skin cancer. World Ozone Day is observed on September 16, every year.

It is celebrated to spread awareness among students of S.K.R.M.C.High School, Vijayawada, about the depletion of the Ozone Layer and search for possible solutions to preserve it. On this day, people from all over the world are expected to join the Montreal protocol to join the talks and seminars. A number of commonly used chemicals have been found to be extremely damaging to the ozone layer. This program was organized by Dr.V.V.Prabhakar Rao, Assistant Professor and Extension Coordinator A.Rajesh.
