ENGINEERS' PLEDGE / OATH

We, the Engineers and Technologists of India, do solemnly pledge to advance the science and practice of Engineering for sustainable development of our country, and for human progress, in general.

As engineers and technologists, we affirm to uphold the honour and dignity of our profession by promoting efficiency, acting without fear and favour, and striving relentlessly to expand the frontiers of knowledge. It would be our constant endeavour to encourage creativity & innovation and imaginatively use natural resources to improve the quality of life of our people.

We swear to dedicate our experience, knowledge and skill to public good.

Vision: The Department of ECE endeavors to produce ingenious, preeminent and socially responsible engineers

Mr.M.Rama Krishna,HOD of ECE

We the department of ECE are glad to bring forth the news letter “*ECE AVENUE* ” which is a symbol of team work with which the department has been flourishing for years and to go.

The department emphasize the welfare of students both in their academics and personality as budding Engineers of future India.

We the faculty abide by the mission and vision of the department so that it reflects our harmony in the department.

We inculcate to the students that discipline and technology are the seeds for the growth of an individual in the society.

I as HOD feel proud to work with the faculty in the department who always obeyed and supported for the small but new innovatives such as Research Lab, M.O.U’s, training programs, mini and major projects etc.

I thank the Management for giving me a place to explore and implement my ideas in the process of working for the amelioration of the Institute.

Our Faculty is our strength

Education is the Key to unlock the Golden door of Freedom --George Washington Carver

Ece 1, 2018 TO 2022

ECE 2, 2018 TO 2022

***Vision:** The Department of ECE endeavors to produce ingenious, preeminent and socially responsible engineers*

Mission:

M1: Commitment to well structured and quality oriented programs .

M2: To instil he students with advanced technologies to meet the current trends.

M3: To provide ethical value based education with social commitment.

Program Educational Objectives (PEOs):

PEO-I: To Transform the knowledge of basic sciences and mathematics into Electronics and Communication applications by the use of modern tools .

PEO-II: To analyze,design,simulate and synthesize the electronic systems useful for engineering fields .

PEO-III: To posses effective communication,managerial and leadership qualities in a career embedded with social commitment and ethical values .

Program Specific Outcomes (PSOs):

PSO1: Develop Systems and Algorithms in the Fields of VLSI, Communication, Signal Processing and Embedded Systems for Contemporary needs .

PSO2: Demonstrate competence in the areas of Communication Systems through effective Higher Education and Successful careers.

Program Outcomes (POs)

1. Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.

2. Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and Engineering sciences.

3. Design/Development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Environment and sustainability: Understand the impact of the

professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.
