

6.1.2. Photography Club

The Art and Photography club is made up of people who are passionate about capturing and creating beauty. The club's goal is to provide opportunity for students to discover their inner artist. It also provides them with a canvas on which to create their visions. The institute creates an environment in which students can explore, develop, employ and express their thoughts in the areas of photography and videography, as well as capture and modify their abilities.
