## Department of Civil Department 2016-17

### Feedback Action Taken Report

Dt: 5/05/2016

Based on the feedback received from alumni on Curriculum Design, it was understood that the relevance of the subjects pertaining to the course failed to match the job requirements and industry needs.

Employers' feedback forms revealed that the course opportunity for self-learning in the curriculum need to be enhanced.

The faculty feedback explored the importance of industry integration in the syllabi. The faculty was obliged to teach lessons which were not meeting the industry expectations.

Students felt that the curriculum delivery did not offer them an opportunity for self-learning and self- growth.

**The Action taken** in accordance to the above feedback enhanced the qualitative measures in the given curriculum by organizing various guest lectures and additional courses-based activities for the students. Extra efforts were made by the Management to encourage the faculty to go for professional courses pertaining to the industry requirements. The department of Civil organized timely meetings with the students and faculty to obtain updates on the curriculum.

## Department of Civil 2017-18

### Feedback Action Taken Report

Dt: 3 /05/2017

The feedback given by the faculty on Curriculum Design stated that the curriculum has relevance to the future aspirations of the learners, but some of the essential skills like inter and intrapersonal and leadership skills are also to be embedded in to the curriculum.

Employers' feedback revealed that the course has not brought significant alteration in the learners towards the course. More focus should be given to fill the industry gaps.

The alumni expressed that the curriculum does not help them in developing their innovative skills. The activities in the curriculum are academically oriented. They suggested to have more task-based teaching activities.

Students expressed that the curriculum has to be reviewed to a great extent to make the course relevant to the industry requirements. They found placements difficult due to the lack of skills. Students expressed that the delivery of curriculum with regard to managerial skills and programming skills should be stressed through activity-based teaching.

**The Action taken** in this context brought addition numbers to the certification courses to meet the industry requirement which also gave opportunity to improve their communication skills. The feedback brought qualitative initiatives for organizing various academic activities like seminars, projects, guest lectures etc. The department of Civil took up various projects in the outskirts of the city to provide industry exposure to the students.

## Department of Civil 2018-19 Feedback Action Taken Report

Dt: 7/05/2018

The alumni in their feedback stated that the Curriculum Design lacked practical implications and emerging technical concepts. They suggested to have syllabus as per the requirement of the industry. They pin-pointed that the syllabus should be updated according to the latest trends.

Employers' feedback forms revealed that activity should be integrated in to the curriculum. They pointed out that mere curriculum-based training does not prepare the students for competitive exams. More classes are to be taken for developing their communication and analytical skills.

The faculty expressed that the curriculum doesn't serve the industry need. The curriculum should be in tunewith the technological advancementsfor better placement. There should be academic flexibly in the curriculum.

Students' feedback revealed that the curriculum doesn't provide much scope for creativity and innovation. The syllabus doesn't challenge according to the changing trends and requirements. There is a less opportunity for employability.

**The Action taken** in this context enhanced value-added courses to provide scope for better learning. number of programmes like guest talks,workshops, and seminars were organized for the students. The department of Civil Engineering took an initiative to encourage students to get involved in socially relevant activities to enhance their leadership qualities. Various clubs and collaborative events were started for the students.

## Department of Civil 2019-20

### Feedback Action Taken Report

Date:11-08-2020

Students' feedback on curriculum revealed that the curriculum doesn't provide much space for creativity and employability. The curriculum doesn't meet the international standards. Industry exposure and interaction are found missing in the curriculum.

The faculty' feedback on the curriculum expressed that the objectives of the curriculum did not meet the industry needs. The practical domains of the subjects were missing in the curriculum.

The feedback given by the alumni stated that the curriculum designed did not meet the current trends. There was a huge gap between the industry and the academia.

The employees' feedback revealed that the present curriculum should have collaborations and industry visits.

**The Action taken** in this context introduced a number of activities pertaining to industry by the departments to strengthen industry interactions and collaborations. Efforts were made to organise a few guest lectures with an industry expert and a visit to an industry by the students. The faculty interaction was also strengthened through add-on programmes and certificate courses.

## Department of Civil 2020-21 Feedback Action Taken Report

Date; 07-01-2021

Based on the students' feedback, it was found that the syllabus was plenty but not helping the students to develop their full potentials. The curriculum doesn't meet the requirements of the latest technology and its relevance.

The faculty's feedback on curriculum also expressed its concerns about the industry requirements. They suggested that the elective courses should be made flexible according to the industry requirements.

The alumni expressed that the multi-disciplinary and inter-disciplinary courses should be added for more effective job performance. The curriculum should be updated according to the present requirements.

The employees gave the feedback that the present curriculum design did not meet the industry needs.

**The Action taken** in this context offered additional efforts from the department to design certificate courses and bridge courses for the students. Importance was given to design a Micro Lesson Plan which would serve as an effective means for innovation and creative techniques in teaching and learning. Several invited talks, Seminars and conferences were organised for the students. The department also organised collaborative events with other departments. Students were encouraged to take projects on the latest topic which would help them to learn independently.
