### Feedback Action Taken Report

Dt: 28/04/2016

According to alumni comments on Curriculum Design, the availability of study resources and curriculum references is insufficient.

According to Employers' feedback, forms revealed that the course did not result in considerable transformation of the learners, and the learners did not grasp the course material as expected.

The teachers expressed satisfaction with the program, but remarked that there was little opportunity to develop entrepreneurial skills.

Students agree that the curriculum delivery in terms of administrative and programming abilities is inadequate, and they underlined the importance of technical training and the present skills did not provide scope for industry requirements.

**The Action taken** in response to the above is an increase in the quality of the measures through academic activities such as seminars, guest lectures, and so on. Students were encouraged to participate in workshops. Skill based activity were implemented. Students also worked on innovative projects.

### Feedback Action Taken Report

Dt: 2/05/2017

Based on faculty comments on Curriculum Design, it was discovered that the curriculum is not relevant to the learners' future ambitions, and it lacked several key mechanisms such as inter and intra-personal abilities.

The employers suggested that the course had not resulted in substantial changes in the learners' attitudes regarding the course.

Alumni indicated pleasure with the curriculum, although the platform did not aid in the development of innovative skills.

Students believed that the curriculum needed to be thoroughly examined in order for the course to be relevant to industry requirements.

**The Action performed** in this area resulted in an increase in the number of certification courses to meet industry needs. The feedback improved the quality of the organization of numerous academic and non-academic activities. Students were encouraged to participate in a variety of academic events such as paper presentations, debates, seminars, and other non-academic events through clubs, in order to develop their leadership skills. For the students, a number of guest lectures and seminars were scheduled. Students' performance was encouraged through collaborative activities organized by the department.

### Feedback Action Taken Report

Date;7-08-2020

According to student evaluations, the curriculum did not provide enough opportunities for employment.

Faculty provided feedback stating that curriculum should serve industrial demands. The faculty's feedback on Curriculum Design noted that the curriculum was relevant to the learners' future goals, and that some critical abilities such as interpersonal, intrapersonal, and leadership skills should be included in the curriculum. Faculty members were also dissatisfied with the curriculum, which lacked opportunities for developing entrepreneurial and managerial abilities.

Alumni feedback on curriculum design indicated that practical oriented education was required, the curriculum was excellent, but the platform did not aid in the development of innovative skills. They concentrated on the needs of the industry.

Employees expressed concern that the current curriculum design did not suit the needs of the sector.

**The Action performed** in this regard was to provide scope for value-added courses to enable students gain employability needs. Students were encouraged to participate in projects that would allow them to understand more about current events in the world. The lesson plan brought out pedagogical insights paving the way for creativity and innovation. IQAC offered a number of high-quality activities and projects relating to industry requirements.

### Feedback Action Taken Report

Date; 02-01-2021

According to student reviews, the syllabus was too long and did not aid employability.

Electives should be more effective, according to teacher input. The curriculum was not kept up to date with current events. The Curriculum was lacking in terms of creative concepts related to developing trends.

Multi-disciplinary courses should be incorporated to the curriculum based on alumni feedback on curriculum design for more effective work performance.

Employees stated that the current curriculum design did not fulfil the needs of the sector.

**The Action taken** in this area was improved certificate courses and add on programs to provide placement opportunities to the students. Students were encouraged to participate in academic activities such as paper presentations, seminars, guest lectures etc, as well as non-academic events, such as community service and social relevant activities, in order to improve their leadership skills. Students were exposed to a variety of guest speakers and workshops. Through collaborative activities, the department attempted to inspire students to learn.
